

Protect your property and record high-resolution images!

Our Halogen Sensor Security Light is a combination of a high-powered security light, movement sensor and digital camera so whoever steps onto your property invited or uninvited will be recorded.

The sensor turns on the 500 watt security light when movement is detected, a picture is taken of an area up to a distance of 10 metres and records it to the SD card in the unit. The 2GB SD card can hold up to 5000 pictures or 1000 video clips.

You can check to see who has visited your house and if anything untoward does happen, you will be able to provide real hard evidence to the authorities of what actually took place

Easy to install, it is ideal for protecting homes, sheds, garages, etc.

2GB SD Card included

Only
